

# Rain Computing – User Manual

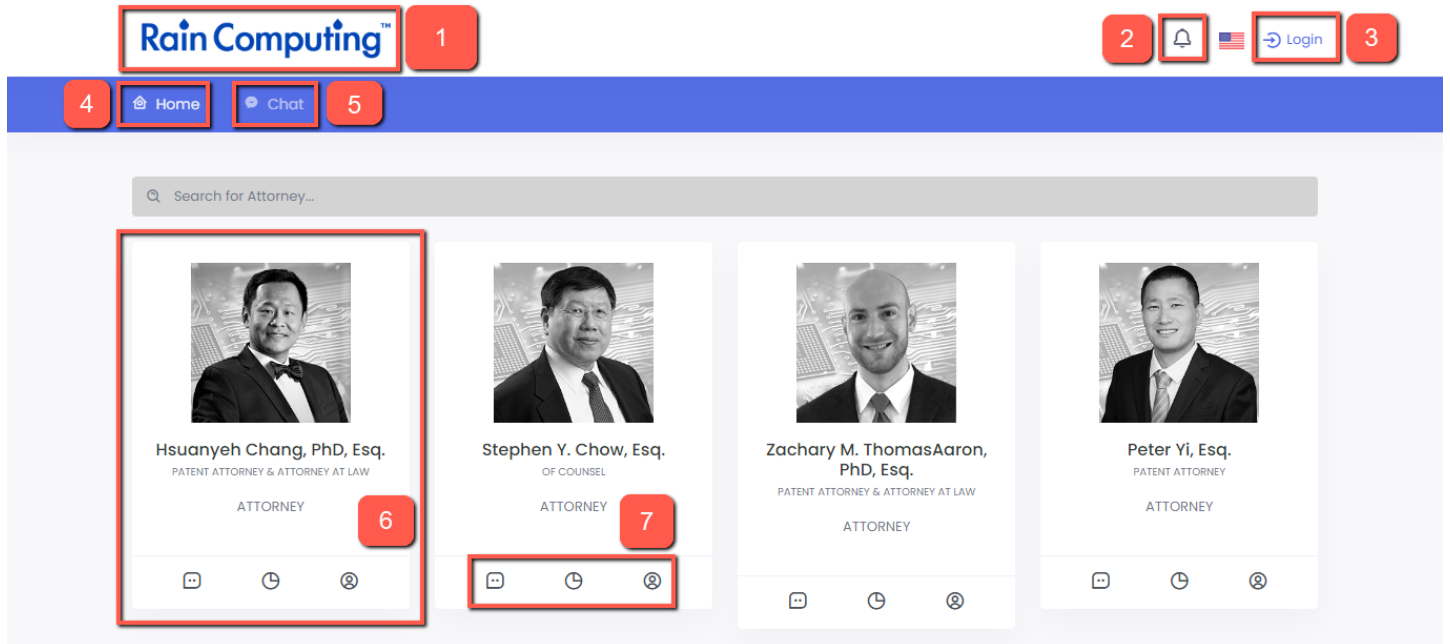

**Rain Computing™**

## ● **Introduction**

Rain Computing is a software tool that supports attorneys and law firms to manage their day-to-day practice, handle client correspondences based on individual cases, and manage client intakes. It also allows the public to search for attorneys subscribed to the software and has the capability to create and manage documents for the cases that the attorneys are handling. An in-and-out application to deal with all the attorney-related activities under one hood. This document is only meant for the Web version of the Rain-computing app.
